Office Visit Summary

Patient: Margaret Wilson

Date of visit: October 14, 2024

Seen by: Maya Patel, MD

Reason for visit

Routine follow-up for blood pressure management. Daughter present.

Reported since last visit

Patient reports occasional dizziness when standing up quickly, most often in the morning. No falls reported. Appetite unchanged. Family reports she has seemed more tired in the afternoons.

Medications

Continue lisinopril 10 mg once daily.

Continue vitamin D 1000 IU once daily with breakfast.

No changes made at this visit.

Plan and recommendations

1. Encourage hydration throughout the day.
2. Advise standing up slowly from seated or lying positions.
3. Continue the home stretching routine each morning.
4. Family to record any further dizziness episodes.

Follow-up

Schedule a follow-up with primary care in 2-4 weeks.

Physical therapy evaluation is scheduled; the clinic will call to confirm the appointment time.

This summary is provided for the patient and their care circle.
